

No New Power Plant in Redondo

California law requires the existing AES Redondo Beach power plant be decommissioned or replaced.

AES submitted its plan to rebuild a NEW power plant in Redondo.

**LET'S
STOP
IT!**

WHY WE DO NOT NEED IT

- The City's own studies call the power plant "the major blighting influence" in the Redondo harbor area.
- Our power plant is one of the top 100 polluters in the state.
- Not needed - supplying less than 1/10th of 1% of our power.

YOU ARE NEEDED

- **Sign the petition**
- Volunteer
- DONATE

It will cost \$35,000 for a lawyer to write the initiative. We need donations before the end of October 2011.

Our new Waterfront without the Power Plant—one integrated approach of Park, Business and Institutional.

There are many visions for how we can transform our waterfront - this is just one. How do you envision this opportunity?
